

Program Information

Our Water Conservation Program provides rebates to: (1) replace your older toilet with a new ultra-low flow or high-efficiency toilet, (2) replace your old clothes washer with a high-efficiency clothes washer, or (3) replace your grass with low water usage plants, rocks, and/or synthetic turf. The District also provides a variety of free water saving devices to Village residents.

The funding for this program comes entirely from developer fees and rebates will be provided as long as funds are available. The purpose of the program is to reduce demand and promote efficient use of our groundwater supply in order to provide a sustainable water source for present and future residents.
